

# TAG Solutions

## Innovative System Integration & Automation Excellence

### What We Deliver

-  Robotics | Vision | Controls
-  Custom Automation Cells
-  UL508A Panel Shop

### Applications

- Part Inspection
- Vision-Guided Robotics
- Machine Tending
- Palletizing
- GE to Emerson Migrations

### Core Capabilities

#### Technologies We Integrate:

-  **Robotics:** Universal Robots, FANUC, EPSON
-  **Vision Systems:** Cognex, LMI Technologies, SICK, Teledyne DALSA
-  **Control Systems:** Emerson PACSystems, Siemens TIA Portal, Allen-Bradley Studio 5000, Horner Cscape

### UL508A Certified Panel Shop

**Build-to-Print:** Fast, high-quality assembly using your existing designs

**Design-to-Build:** Fully engineered panels based on your requirements

UL 508A INDUSTRIAL  
CONTROL PANEL  
FABRICATOR

**Our Mission:** To be the preferred solutions provider in Automation through expertise in Robotics, Vision, & Controls

## Specialized Services

## Your Turnkey Engineering Project Experts

### Custom Automation Cells

We design and build machine tending and palletizing cells customized to your production line, increasing throughput and minimizing downtime.

### Control Systems Expertise

- PLC programming and architectural development
- Seamless migration of legacy GE systems (90-30/90-70, Series 6) to modern Emerson Rx3i platforms
- Integration of HMI/SCADA solutions for full process visibility

### T&M Services

- In-house repair
- On-site field repair
- Remote and on-site technical support

## About TAG Solutions

At TAG Solutions, we specialize in delivering turnkey automation and control solutions that integrate cutting-edge technology with real-world industrial applications. With a team of engineers proficient in multiple platforms and technologies, we bring efficiency, precision, and scalability to your operations.

## Our Mission

To be the preferred solutions provider in Automation through expertise in Robotics, Vision, & Controls
